

Random Number Generator Certificate

This is to certify that **CDC IT Services Ltd.** has evaluated & verified the **Random Number Generator (RNG)** used by LA Sixxer Gaming Networks Pvt. Ltd. and found that the RNG complies with the relevant standards. *

CDC IT Services Ltd. requests the provided the source code files to **CDC IT Services** for evaluation as below.

ValidateGroup.js

GameServer.js

Operator:	LA Sixxer Gaming Networks Pvt. Ltd.
Operator URL:	https://www.6ixxerrummy.com
Software provider:	LA Sixxer Gaming Networks Pvt. Ltd.
Software provider URL:	https://www.6ixxerrummy.com

The RNG uses a well-known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness. CDC IT Services has evaluated card shuffling for single deck (with one joker), two decks (with one joker) and four decks (with one joker).

The shuffling tests were conducted on large enough samples to give the calculations sufficient statistical power. CDC IT Services has found that the card sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

CDC IT Services has verified, through mathematical and statistical analysis, that the Random Number Generator (RNG) distributes number with fair distribution, lack of bias to particular outcomes and sufficient non predictability. All statistical tests pass at the 99% confidence interval level. This **RNG Certificate** is valid if it is available at **CDC IT Services website**. [Click here](#) for original Certificate.

Yours Faithfully
